#### **Protest Tarago Toxic Waste Incinerator:-**

#### **Sign The Petition.**

Make no mistake that it will affect us all, including in our veggie patches and farmland. This action is a priority for our Community Sustainability Hub

#### **Message from Tarago Toxic Incinerator Group**

Please help save your gardens and families and farms by signing the e-petition to stop the incinerators from happening that government wants to build in NSW the dioxins and furans will pollute your land water air your farms causing cancers and birth defects proven already by overseas European incinerators the filters proven cannot stop the toxins and the

ash cannot be buried in the ground as its highly toxic farmers cannot eat the fresh farm eggs within 3 to 5 km as they are so highly toxic don't let your kids and grandkids suffer for the government mistakes.

**URGENT** Things are moving. Here is a media release (MR) from all the New South Wales groups/areas who may be getting an incinerator.

Our e-petition to the NSW Legislative Assemble in now live. The link to the petition is in the MR but here it is as well.

**Join The Protest Tarago Toxic Waste Incinerator at the Sydney Cricket Ground 1st November 8.30am - 9.30am at gate 4**

A protest against the construction of the Toxic Incinerators is being organised outside the SCG, where the Toxic Waste Conference is being held and it would be good if concerned members of the G-M CSH group, could attend to add our voices.

Among those already involved is the Sydney Climate group.

It is hoped that following can attend:-

- Amanda Cohn, a Green MLA for Albury
- Jeremy Buckingham an MLA
- Jeff Angel from the Boomerang Alliance, see: <https://www.boomerangalliance.org.au/angel4green>

**An observation through a member of the CSH members in terms of other serious likely impacts is below of the Toxic Waste Incinerators:-**

“the other problem with incineration not mentioned is that it’s a profit seeking business, so it seeks to ever increase the amount of waste people produce, and if people in the initial source area don’t produce enough waste to keep the fires burning to full capacity, the company will import garbage from elsewhere. Encouraging ever
